Electronic Check Service EQUIPMENT SETUP

Omni™ 3730LE / Vx570LE and the RDM EC6000i Imager

TO SETUP YOUR EQUIPMENT, FOLLOW THESE STEPS:

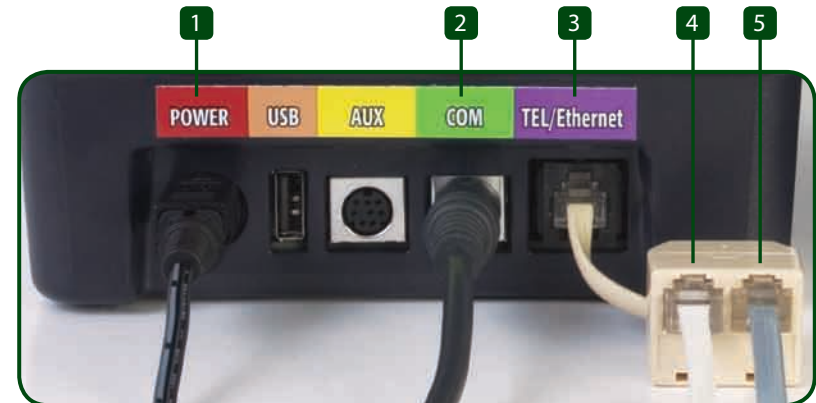

1. Please refer to the Equipment Checklist on the back page to verify that the items listed are included in this package.
2. Connect the RDM Power Supply **1** port to an external power source using the RDM Power Supply cable.
3. Connect the Terminal's RS232 port **B** to the RDM Imager port **2** using the gray RDM Imager Interface Cable.
4. Connect the Phone Cord Splitter to the RDM Imager phone port **3**.
5. Connect the Terminal's phone port **A** to the Phone Cord Splitter port **4** using the white Phone Cord.
6. Connect the gray Phone Cord to the Phone Cord Splitter port **5** and to an analog phone wall jack.
7. If processing online debit using an external PIN pad, connect it to the terminal's PIN pad port **C**.

Note: Always connect the external PIN pad to the Terminal's PIN pad port **BEFORE** connecting the Terminal to an external power source.

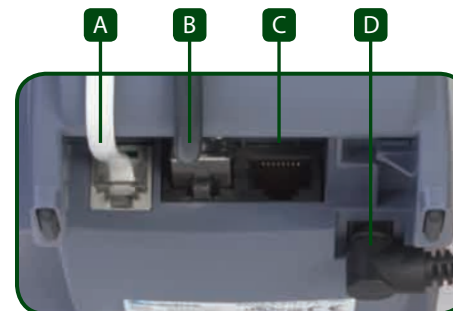

8. Connect the Terminal's Power Supply **D** to an external power source using the Terminal's Power Supply Cable.

IMPORTANT:

- Power up your RDM Imager until a steady orange light indicates ready mode. Then, power up the point-of-sale terminal.
- We recommend that the RDM Imager be placed to the left of the point-of-sale terminal.
- Place terminal equipment at least 12" away from magnetic fields, such as cash registers, computer CRT displays, electric outlets or other magnetized equipment.
- Equipment setup requires using a direct analog phone line.
